Email Forensic Investigation Report

Case ID: TM-3EC5249C
Report Generated: 2026-09-06T06:30:49.281651

1. Executive Summary

Severity	MEDIUM
Risk Score	55/100
Threat Type	Business Email Compromise / Financial Phishing

Assessment: The email contains potentially suspicious characteristics and should be reviewed by an investigator.

2. Email Evidence

Filename	N/A
Sender	Bharat Finance Accounts <accounts@bharatfinserv.example>
Recipient	employee@company.example
Reply-To	verification@bharatfinserv.example
Subject	Urgent Payment Verification - Invoice #BF-48291
Date	Fri, 28 Aug 2026 22:24:58 +0530
Message ID	<BF-48291-20260828@bharatfinserv.example>

3. Email Authentication

Authentication Check	Result
SPF	
DKIM Signature	Missing
Authentication Summary	

These checks help determine whether the sender's domain was properly authenticated. Failed checks increase the suspicion level but should be considered together with the other evidence.

4. Email Header & Relay Analysis

Total Relay Hops: 2

Earliest Observed Public IP: 171.76.84.43

Observed Public IP Addresses

- 171.76.84.43

Note: The earliest observed IP represents source infrastructure visible in the email headers. It should not automatically be treated as the attacker's physical location.

5. IP Intelligence

IP Address	Country	City	Network / ISP	Risk
171.76.84.43	Unknown	Unknown	Unknown	UNKNOWN

IP location data describes the network infrastructure associated with the observed address. It does not necessarily identify the attacker's real-world location.

6. URL & Domain Intelligence

URLs Found: 1

- <https://secure-bharat-pay.example/verify/invoice/BF-48291>

Domains Found: secure-bharat-pay.example

The domain and URL analysis checks for suspicious naming patterns, unsafe links and indicators that may suggest impersonation or phishing activity.

7. Threat DNA

Threat DNA is a compact summary of the email's important security characteristics. It helps investigators quickly compare this email with other suspicious emails.

Security Feature	Finding
SPF Authentication	UNKNOWN
DKIM Authentication	MISSING
DMARC Authentication	UNKNOWN
Contains URL	Yes
Number of URLs	1
Financial / Payment Intent	Yes
Urgency Language	Yes
Reply-To Different From Sender	Yes
Contains Attachment	No
Email Relay Hops	2
Suspicious / Impersonating Domain	Yes

Threat DNA Fingerprint

SPF-UNKNOWN|DKIM-MISSING|DMARC-UNKNOWN|URL-1|FIN-1|URG-1|RPLY-1|ATT-0|HOP-2|TYPO-1

Detected Pattern: Business Email Compromise / Financial Phishing

8. Identified Risk Factors

The following indicators contributed to the threat assessment.

DKIM authentication is missing or failed [MEDIUM]

Urgency language detected [MEDIUM]

Detected terms: urgent, immediately

Financial/payment-related intent detected [HIGH]

Detected terms: payment, invoice, account, transaction

Credential-related language detected [HIGH]

Detected terms: verification

1 URL(s) detected in email [MEDIUM]

9. Evidence Integrity

Integrity Method: SHA-256

Evidence Hash

51fba696831f9de1cce5872553a36f0bbde26d8cd1f5793d836509fad65e761d

This SHA-256 hash acts as a digital fingerprint of the analyzed email evidence. If the original evidence changes, its hash will also change, helping investigators detect unexpected modification.

10. Investigator Conclusion

The email contains potentially suspicious characteristics and should be reviewed by an investigator.
