Email Forensic Investigation Report

Case ID: TM-CC9CEA06

Report Generated: 2026-09-06T19:18:20.919266

1. Executive Summary

Severity	LOW
Risk Score	20/100
Threat Type	Credential Phishing

Assessment: No strong malicious indicators were identified by the current analysis engine.

2. Email Evidence

Filename	Your certificate for HakITxMRDU'26 - TechFusion Hackathon.eml
Sender	Unifesto <no-reply@updates.unifesto.app>
Recipient	mz818704@gmail.com
Reply-To	
Subject	Your certificate for HakITxMRDU'26 - TechFusion Hackathon
Date	Fri, 28 Aug 2026 16:45:12 +0000
Message ID	<010901a04942d7df-5fbd1e40-1cfc-4fe7-ab31-5258778b67da-000000@ap-south-1.amazonses.com>

3. Email Authentication

Authentication Check	Result
SPF	pass (google.com: domain of 010901a04942d7df-5fbd1e40-1cfc-4fe7-ab31-5258778b67da-000000@updates.unifesto.app designates 76.223.180.9 as permitted sender) client-ip=76.223.180.9;
DKIM Signature	Present
Authentication Summary	mx.google.com; dkim=pass header.i=@unifesto.app header.s=j5sgdvtdllolac4p63y6uazlerifmsf header.b=fFFWN0ax; dkim=pass header.i=@amazonses.com header.s=rIntogby6xsxlnvvyxwnvvhttakdsqto header.b=y1oo3QF7; spf=pass (google.com: domain of 010901a04942d7df-5fbd1e40-1cfc-4fe7-ab31-5258778b67da-000000@updates.unifesto.app designates 76.223.180.9 as permitted sender) smtp.mailfrom=010901a04942d7df-5fbd1e40-1cfc-4fe7-ab31-5258778b67da-000000@updates.unifesto.app; dmarc=pass (p=QUARANTINE sp=QUARANTINE dis=NONE) header.from=updates.unifesto.app

These checks help determine whether the sender's domain was properly authenticated. Failed checks increase the suspicion level but should be considered together with the other evidence.

4. Email Header & Relay Analysis

Total Relay Hops: 2

Earliest Observed Public IP: 76.223.180.9

Observed Public IP Addresses

- 76.223.180.9

Note: The earliest observed IP represents source infrastructure visible in the email headers. It should not automatically be treated as the attacker's physical location.

5. IP Intelligence

IP Address	Country	City	Network / ISP	Risk
76.223.180.9	United States	Seattle	Amazon.com, Inc.	LOW
08.28.09.45	N/A	N/A	N/A	UNKNOWN

IP location data describes the network infrastructure associated with the observed address. It does not necessarily identify the attacker's real-world location.

6. URL & Domain Intelligence

URLs Found: 4

- <https://pqjpm9md.r.ap-south-1.awstrack.me/L0/https:%2F%2Funifesto-storage-bucket.s3.ap-south-1.amazonaws.com%2Fcertificates%2Fa81ab92431286685ff04eba5e7b9cf61.pdf/1/010901a04942d7df-5fbd1e40-1cfc-4fe7-ab31-5258778b67da-000000/P2QbSDqu3aqo xjcHGEALTZgZHdk=258>
- https://pqjpm9md.r.ap-south-1.awstrack.me/L0/https:%2F%2Funifesto.app%2Fverify%2Fa81ab92431286685ff04eba5e7b9cf61/1/010901a04942d7df-5fbd1e40-1cfc-4fe7-ab31-5258778b67da-000000/dOQ3ksHH69rmVJ07d_ZNr5FuiMM=258
- <https://unifesto.app/verify/a81ab92431286685ff04eba5e7b9cf61>
- <https://pqjpm9md.r.ap-south-1.awstrack.me/I0/010901a04942d7df-5fbd1e40-1cfc-4fe7-ab31-5258778b67da-000000/MzlesJk247Vj9M4jzgmHJT27a3c=258>

Domains Found: pqjpm9md.r.ap-south-1.awstrack.me, unifesto.app

The domain and URL analysis checks for suspicious naming patterns, unsafe links and indicators that may suggest impersonation or phishing activity.

7. Threat DNA

Threat DNA is a compact summary of the email's important security characteristics. It helps investigators quickly compare this email with other suspicious emails.

Security Feature	Finding
SPF Authentication	PASS
DKIM Authentication	PASS
DMARC Authentication	PASS
Contains URL	Yes
Number of URLs	4
Financial / Payment Intent	No
Urgency Language	No
Reply-To Different From Sender	No
Contains Attachment	No
Email Relay Hops	2
Suspicious / Impersonating Domain	No

Threat DNA Fingerprint

SPF-PASS|DKIM-PASS|DMARC-PASS|URL-4|FIN-0|URG-0|RPLY-0|ATT-0|HOP-2|TYPO-0

Detected Pattern: Credential Phishing

8. Identified Risk Factors

The following indicators contributed to the threat assessment.

Credential-related language detected [HIGH]

Detected terms: verification

4 URL(s) detected in email [MEDIUM]

9. Evidence Integrity

Integrity Method: SHA-256

Evidence Hash

e0dcb45949999b8774f2bb9dc1abc951a1e3e1e71dce031e786cbad9c13d6e50

This SHA-256 hash acts as a digital fingerprint of the analyzed email evidence. If the original evidence changes, its hash will also change, helping investigators detect unexpected modification.

10. Investigator Conclusion

No strong malicious indicators were identified by the current analysis engine.
