Email Forensic Investigation Report

Case ID: TM-E032B984
Report Generated: 2026-09-08T00:46:24.912704

1. Executive Summary

Severity	LOW
Risk Score	35/100
Threat Type	Suspicious Email

Assessment: No strong malicious indicators were identified by the current analysis engine.

2. Email Evidence

Filename	04_vendor_bank_change.eml
Sender	Procurement <procurement@vendor-example.test>
Recipient	employee@company.test
Reply-To	
Subject	Updated Vendor Banking Information
Date	Tue, 08 Sep 2026 10:00:00 +0530
Message ID	

3. Email Authentication

Authentication Check	Result
SPF	
DKIM Signature	Missing
Authentication Summary	

These checks help determine whether the sender's domain was properly authenticated. Failed checks increase the suspicion level but should be considered together with the other evidence.

4. Email Header & Relay Analysis

Total Relay Hops: 1

Earliest Observed Public IP: N/A

Note: The earliest observed IP represents source infrastructure visible in the email headers. It should not automatically be treated as the attacker's physical location.

5. IP Intelligence

IP Address	Country	City	Network / ISP	Risk
203.0.113.70	N/A	N/A	N/A	UNKNOWN

IP location data describes the network infrastructure associated with the observed address. It does not necessarily identify the attacker's real-world location.

6. URL & Domain Intelligence

URLs Found: 1

- <http://vendor-payment-update.test/account>

Domains Found: vendor-payment-update.test

The domain and URL analysis checks for suspicious naming patterns, unsafe links and indicators that may suggest impersonation or phishing activity.

7. Threat DNA

Threat DNA is a compact summary of the email's important security characteristics. It helps investigators quickly compare this email with other suspicious emails.

Security Feature	Finding
SPF Authentication	UNKNOWN
DKIM Authentication	MISSING
DMARC Authentication	UNKNOWN
Contains URL	Yes
Number of URLs	1
Financial / Payment Intent	Yes
Urgency Language	No
Reply-To Different From Sender	No
Contains Attachment	No
Email Relay Hops	1
Suspicious / Impersonating Domain	No

Threat DNA Fingerprint

SPF-UNKNOWN|DKIM-MISSING|DMARC-UNKNOWN|URL-1|FIN-1|URG-0|RPLY-0|ATT-0|HOP-1|TYPO-0

Detected Pattern: Suspicious Email

8. Identified Risk Factors

The following indicators contributed to the threat assessment.

DKIM authentication is missing or failed [MEDIUM]

Financial/payment-related intent detected [HIGH]

Detected terms: payment, bank, account

1 URL(s) detected in email [MEDIUM]

9. Evidence Integrity

Integrity Method: SHA-256

Evidence Hash

99342d8b313833551225ccba45e3d242a4fe872d9bd3fa49a054ea5e1b5c1672

This SHA-256 hash acts as a digital fingerprint of the analyzed email evidence. If the original evidence changes, its hash will also change, helping investigators detect unexpected modification.

10. Investigator Conclusion

No strong malicious indicators were identified by the current analysis engine.
